

WATER CONNECTION APPROVAL (WCA)

Table 1 - Fee Schedule

The following table shows the fees that will be required with application for a WCA. The fee table begins with a starting fee of \$10,000.00 and an increase of 5% for inflation will be added to the fee each year thereafter. If the inflation rate increases more than 5% per year, the percentage increase for the year will increase to match the actual inflation rate. The inflation rate used in this calculation will be determined by the Current Consumer Price Index (CPI-U) published by the Bureau of Labor Statistics. This table may be changed at any time, and/or annual increases may be suspended or modified with Board approval.

When an Applicant pays the initial deposit, the final fee will be subject to the annual increases reflected in the table below. The balance of the final fee remaining after payment of the initial deposit must be included with building plan submittal in accordance with Section 2.0. A WCA will not be issued until this remaining balance is paid in full.
